## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Davis (US 6,447,302) in view of Shaffer et al. (US 4,245,875).

Davis discloses an electrical connector comprising:

- a connector body (26);
- an electrical contact (62);
- a cover (112);
- a biasing member (124).

Davis does not disclose the cover and the body are sealed together by a wall and groove when the cover is closed.

Shaffer et al. teach a cover (44) and a connector body (12) are sealed together by a wall (18) and a groove (form between two member 48, 50) (column 3, lines 24-32).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a wall and a groove into Davis's connector, as taught by Shaffer et al. to seal the connector from moisture.

Art Unit: 2833
